

Yellow Bus Nation Payment Suite Expense Card

Payment Solution

The Yellow Bus Nation Travel and Expense Card program improves administration of your expenses while also providing an unlimited rebate. Like other Yellow Bus card programs, this program is available at no cost to you.

The expense card program lets you control who spends and what they spend on. When the card is used, expenses go

into powerful expense reporting software. You see added efficiency before and after expenses are incurred.

In return, you get cash rebates and added security. With the Yellow Bus expense card, you get **cash back and powerful tools** to reduce fraud and improve efficiency, **without a single penny of cost** for you.

Efficient, Secure Employee Expenses

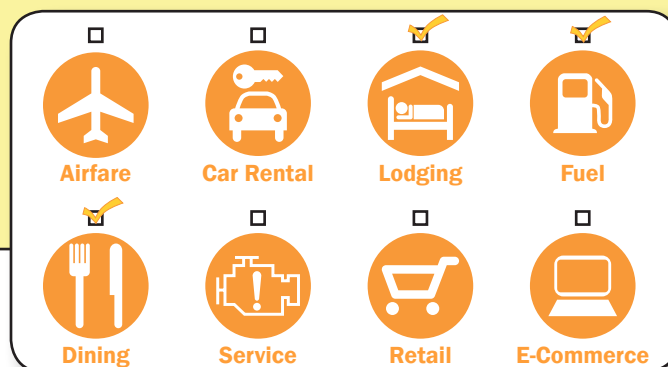

Employee expenses aren't one-size-fits-all. Different employees use travel and expense cards for different types of purchases. The Yellow Bus Expense Card allows you to control employee usage, minimizing the chance for improper spending.

The expense card program provides efficiency for your employees. Instead of being reimbursed for travel and other expenses, your employees can use our convenient card system. Unlike some other card programs, though, you can limit where your employee uses the card.

Want your lead mechanic to be able to use a card to maintain the fleet? Limit spending to auto service and retail. Got a manager who travels the state learning best practices?

Limit spending to lodging, dining, and fuel. Whether your employee needs one or two purchase types or the full gamut of purchases, you can control the spend.

Like other Yellow Bus cards, too, you receive a rebate based on spend. The more you expense, the bigger rebate you receive. You get added efficiency and control, with a cash rebate on top.

Automated Reporting

Our travel and expense card program includes a powerful expense reporting platform at no cost to you. Like other software platforms that can cost hundreds or thousands of dollars each year, the expense reporting platform provides a number of tools to automate expense reporting and approval, including:

- Automated Transaction Loading
- Easy-to-Use Report Completion Interface
- Customizable Approval Process
- Reminders of Pending and Open Tasks
- Reporting for Management and Accounting

Not only do you get unlimited rebates on spend, you get a powerful software tool at no cost to improve process efficiency and security.
